Billy Le

FRONTEND SOFTWARE ENGINEER

WORK EXPERIENCE

4insite, Lead Front-end Engineer   08/2019 - 12/2022

- **Reduced build times by 67%** (from 12 minutes to 4 minutes) by simplifying Webpack configuration, improving developer productivity.
- **Cut shipped CSS by 60%** through optimizing build bundles and integrating TailwindCSS, improving page load times.
- Standardized **50+ React components** in Storybook.js, reducing code duplication by 40% and lowering error rates by 15%.
- Mentored and onboarded **5+ cross-functional teams** (domestic and international), improving onboarding time by 20%.
- Enforced strict code reviews, reducing production bugs by 30% and increasing codebase durability.
- Minimized system downtime, resolving **90% of critical system failures** within the first 24 hours through effective troubleshooting.

SBM Management, Front-end Engineer   11/2018 - 08/2019

- Spearheaded the migration of a **50,000+ LOC Angular application** to React in 3 months, improving system performance by 20%.
- Developed data visualization dashboards using Highcharts.js, impacting **1,000+ users** and enabling real-time metric tracking.

CLC Inc., Software Engineer   09/2017 - 10/2018

- Integrated Typeform surveys into a Backbone MVC app, facilitating data collection from **2,000+ users** on financial goals and hardships.
- Built a split transactions ledger in React and MongoDB, serving **1,500+ users** in managing their budgets more effectively.

Kore Innovations, Full-stack Engineer   04/2017 - 09/2017

- Resolved UI discrepancies across **3 major client projects**, resulting in a **15% improvement** in customer satisfaction scores.
- Contributed to setting up a React application on a Ruby on Rails backend, delivering the project **10% ahead of schedule**.

PROJECTS

Beaver Casa   07/2024 - Present

Developing a property management app that is projected to serve **500+ landlords** in tracking their portfolios, built with AstroJS and React using server-side rendering and server actions.
